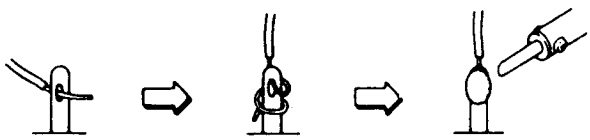
★ SAFETY INSTRUCTIONS

PRECAUTIONS DURING SERVICING

1. Parts identified by the ⚠ (*) symbol are critical for safety. Replace only with parts number specified.
2. In addition to safety, other parts and assemblies are specified for conformance with such regulations as those applying to spurious radiation.
   These must also be replaced only with specified replacements.
   Examples: RF converters, tuner units, antenna selector switches, RF cables, noise blocking capacitors, noise blocking filters, etc.
3. Use specified internal wiring. Note especially:
   1) Wires covered with PVC tubing
   2) Double insulated wires
   3) High voltage leads
4. Use specified insulating materials for hazardous live parts. Note especially:
   1) Insulation Tape
   2) PVC tubing
   3) Spacers (Insulating Barriers)
   4) Insulation sheets for transistors
   5) Plastic screws for fixing microswitch (especially in turntable)
5. When replacing AC primary side components (transformers, power cords, noise blocking capacitors, etc.), wrap ends of wires securely about the terminals before soldering.



6. Observe that wires do not contact heat producing parts (heatsinks, oxide metal film resistors, fusible resistors, etc.).
7. Check that replaced wires do not contact sharp edged or pointed parts.
8. Also check areas surrounding repaired locations.
9. Use care that foreign objects (screws, solder droplets, etc.) do not remain inside the set.

PRECAUTIONS BEFORE/AFTER REPAIRING THE UNIT

[ABOUT THE POWER SUPPLY]

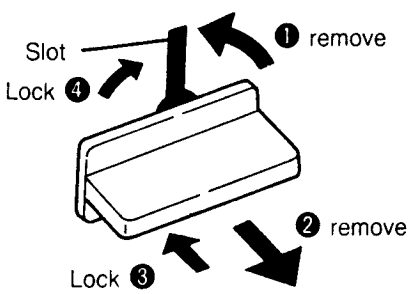
Power supply and power control data for the CD-M600 are supplied from the amplifier and tuner. Therefore when repair of the CD-M600 is necessary, repair should be made together with the amplifier and tuner.
To repair the CD-M600 without the tuner, use the following procedure, it can be repaier together with the amplifier only.

1) While pushing G.E REC button on the amplifier, press the POWER button on the amplifier to turn the power of the amplifier on.
2) While pushing the DISPLAY and ▶▶I buttons simultaneously on the CD-M600, connect the flat connection cable from the CD-M600 to the amplifier to turn the power of the CD-M600 on.

To turn off the power of the amplifier and CD-M600, the AC power cord must be disconnected.

[ABOUT THE TRANSPORT LOCKING PLUG]

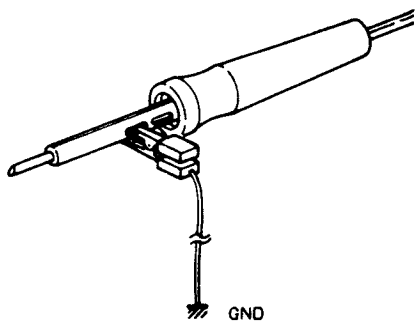
This CD player has transport locking plugs located on the bottom panel. These plugs are locks the laser pick up mechanism to prevent vibration during transportation.
Before playback, make sure to remove the locking plugs.
Before transporting the unit, make sure to remove the compact disc, and insert the transport locking plugs to lock the laser pick up mechanism.



[PRECAUTIONS IN REPAIRING]

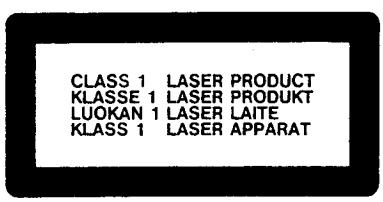
When repairing or adjusting the unit, please note the following points.

1. Do not put excessive pressure on the mechanical parts (operation parts), including the pick up block, as extremely high mechanical precision is required in these parts.
2. When the base is removed for repair or adjustment, make sure that there are no metal objects in the narrow gap between the P.C boards or the mecha. parts and the base.
3. The micro-computer and the CD signal processing ICs can be damaged by static electricity or leakage from a soldering iron during repair.
   While soldering, use a low leakaged (anti static) type soldering iron or take precautions against leakage as in the illustration below.

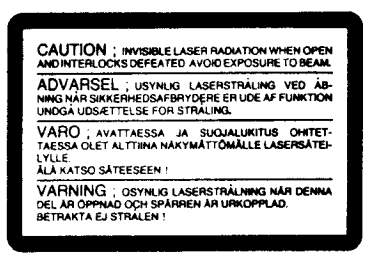


4. Do not loosen any screws in the pick up block.
   When handling the pick up block, please refer NOTE or CAUTION accompanying the explanation of procedure.
5. For your own safety, avoid hazardous invisible laser radiation. Do not look at the laser beam (objective lens) directly.
6. On models for some countries, laser warning labels are affixed on the outside and inside the unit as shown below.
   For your own safety, read these labels carefully when repairing or adjusting the unit.

[EUROPE, SCANDINAVIA, UK and AUSTRALIA]



Label affixed on the rear panel of the unit



Label affixed on the disc clamper inside the unit
