

802D

B&W
Bowers & Wilkins

The 802D uses the same midrange and tweeter layout as the larger 800D and 801D, but its twin 8" bass drivers are housed in a narrower and more compact cabinet, making it ideal for those listeners that value the detail and imaging of the larger systems, but prefer a smaller aspect.

Although the styling is clearly based on its predecessor, the Nautilus 802, it has been revised and enhanced by changes to the plinth, the underside of the cabinet and the way the tweeter sits on the midrange enclosure. For those who prefer to operate the speaker with the grille in place, it's curving profile detail lifts the whole look of the cabinet.

All three models that have aluminium plinths are supplied with roller glides for easy manoeuvrability. These may be replaced by optional heavy-duty feet if preferred. This new foot design is double-ended, with a spike for carpeted floors at one end and a clear, non-marking rubber pad at the other for more vulnerable surfaces. A total of 1.6" height adjustment is possible, which allows a few degrees of tilt if necessary.

Description: 3-way vented-box system
Frequency Range: -6dB at 27Hz and 33kHz
Frequency Response: 34Hz – 28kHz \pm 3dB on reference axis
Sensitivity: 90dB spl (2.83V, 1m)

Nominal Impedance: 8 Ω (minimum 3.5 Ω)
Dimensions: H 1135mm W 368mm D 563mm
H 44.7" W 14.5" D 22.2"
(not including feet)
Weight: 80 kg / 176 lbs.
Finishes: Cherrywood, Rosenut, Black Ash
