

ELAC Miracord 60

In 2016 the name Miracord was re-established in the high-end audio community. 3 years and 3 product launches later, the Miracord 60 is ready to continue the unique ELAC Audiophile Turntable Saga.

Carbon Fibre Tone Arm:

A light-weight carbon fibre tone arm with gimbal bearing and a removable headshell offers flexibility in the choice of cartridge.

Aluminium Platter:

The Miracord 60 is equipped with a massive diamond chamfered piece of engineering art made of 22 mm die-cast aluminium.

Servo controlled DC motor:

A built-in optical sensor, that sends its signal to a PID algorithm in the microcontroller which will then tune the speed of the DC motor.

The Miracord 60 was designed to bring the world-renowned and eye-catching design of the successful Miracord 90 to a new class of ELAC turntables.

The result is a turntable that does not deny its lineage while emphasising its individuality. The new Miracord 60 embodies the meaning of smooth vinyl precision to perfection and a timeless, elegant design.

TECHNICAL SPECIFICATIONS:

TURNTABLE SECTION

- Drive System Belt-drive
- Motor DC motor
- Selectable Speeds 33 $\frac{1}{3}$ and 45 rpm
- Rotation Speed Variation +/- 0.33 %
- Wow and Flutter < 0.12 %
- Platter Aluminum die-cast

TONEARM SECTION

- Type Carbonfibre tube
- Overhang 18.6 mm
- Offset Angle 25 degrees
- Anti-Skating Adjustment 0...4
- Main Bearing Stainless steel

CONNECTOR

RCA pin jack

VOLTAGE

100 to 240 V AC / 50/60 Hz

POWER CONSUMPTION

1.5 W (less than 0.5 W at standby)

Frontview

Rearview
