B 8

Bookshelf speaker

High-End equipment is not necessarily large and bulky. Our Series 8 is the most convincing proof that even small, compact components are capable of satisfying the most exacting audiophile demands. For this superlative range of electronic units we have now developed the perfect loud-speaker: the B 8 bookshelf monitor. The cabinet is made of aluminium with a hand-brushed, anodised finish which perfectly matches the look of the Series 8 components. Although only 19 cm wide and just 30 cm tall, the B 8 gives you the same experience as when listening to substantially larger loudspeakers. The high-end drive units employed are based on the technology of the Criterion speakers. The 20 mm fabric dome tweeter and 150 mm high-end bass unit harmonise perfectly, and in conjunction with the precisely calculated crossover produce extremely homogeneous dispersion behaviour with an authentically spacious sound and accurate imaging. The sound image is characterised by its clarity, total lack of colouration, openness and impressively deep bass. With its non-critical impedance curve and good efficiency the B 8 is the ideal monitor for the AMP 8 high-end power amplifier, and showcases the audiophile characteristics of the Series 8 perfectly.

Specifications

	B8
Principle	Bookshelf speaker, 2-way, bass reflex
Nominal power rating	100 Watts
Music power rating	150 Watts
Impedance	4 Ohms
Frequency range	35 - 30000 Hz
Sensitivity	86 dB
Drive unit bass	1 x 150 mm
Drive unit high range	1 x 20 mm
Crossover frequency	2000 Hz
Features	Overload indicator
Dimensions H x W x D	30 x 19 x 27 cm, 11.8 x 7.5 x 10.6 inch
Weight	8 kg, 17.6 lbs
